

# CLIMATE ADAPTATION AVOIDS LOCKED-IN IMPACTS FROM HISTORIC EMISSIONS

Total economic dividend of climate resilience by 2050

Source: Deloitte Access Economics

# A DISASTER WAITING TO HAPPEN

# A 5 POINT NATIONAL PLAN TO LIFT RESILIENCE TO NATURAL THREATS

## 1. 1/3 INVESTMENT

Response, Recovery and Resilience – instead of 3% resilience and 97% response and recovery.

## 2. EARTH OBSERVATION FOR DISASTERS

Utilise satellites for early detection and prevention.

## 3. DATA AND EVIDENCE-LED

Data on the least resilient communities and most exposed landscapes to inform grants and resilience investment.

## 4. LOCAL ACTION PLANS AND RESILIENCE BASED VOLUNTEERING

Consistent approach to assist communities with resilience building and volunteers deployed to at risk communities to help them prepare before disasters happen.

## 5. NATIONAL ASSET REGISTER

Recovery infrastructure including accommodation that can be deployed when disasters strike.
